

cfxAutomate is the Modern IT Automation platform that is Analytics driven and has complete awareness of typical IT operational constructs, mode of operation and data formats.

cfxAutomate brings together key foundational technologies like Serverless, Microservices, AI and CI/CD & DevOps to deliver scalable, efficient and intelligent automation that modern IT demands

Its flexible architecture and self-learning capabilities makes it easy to adapt and optimize to any customer environment. It helps operational teams in continuously enriching their automation playbooks and also enrich alerts/incidents with contextual information to help address issues faster when manual intervention is required.

## Key Capabilities

### Modern Architecture

- Based on Microservices/Container technologies
- Leverages Serverless computing model

### Intuitive Workflow Engine

- Easy to use workflow editor
- Event driven/on-demand execution

### Integration Support

- Out of box support for popular ITSM tools
- Seamless integration with Cloud services (Lambda etc.)

### Smart diagnosis

- Self-learning of dependencies
- Analyzes data from multiple sources

### Incident Enrichment

- Provide rich contextual information
- Helps in building automation playbooks

### Change propagation

- Propagates changes to all targeted CI
- Trigger based changes

## Key Use Cases

### Hybrid-IT Automation

Execute automation tasks across multiple clouds leveraging native capabilities

### Smart Ticketing

Automatic creation, clearing and enrichment of tickets based on the outcome on incident and its remediation tasks.

### Virtual NOC Engineers

Ability to create and train virtual NOC engineers to automate tasks based on context and triggers

### Knowledge Management & Playbooks

Build knowledge repository and playbooks to not only automate operations but move to predictive operations

### E-bonding

Replicate tickets between multiple systems for compliances or to meet customer needs

# Key Features

Integrations	Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor
Reporting	Incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam
Serverless	Quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat
Integration with AWS Lambda	Duis aute irure dolor in reprehenderit in voluptate velit esse

## Key Technologies / Integrations

- Clouds
- Datacenter
- Monitoring
- Collaboration Tools
- Asset Inventory
- ERP / CRM
- Storage
- Servers
- VMs
- Containers
- Microservices
- Applications
