

With ever changing IT asset landscape, IT environments have become more complex and dynamic. Constant addition and removal of software and hardware assets, coupled with new types of consumption models making it difficult to effectively manage, plan and optimize asset utilization and spend. With cfxRealize enterprises can automate asset lifecycle management and gain complete visibility into asset lifecycle and intelligently plan and budget for new equipment, replacements and refresh cycles.

cfxRealize leverages integrations with over 100 data sources to deliver critical insights across asset lifecycle, utilization and spend in a easy-to-understand dashboards without creating huge management workload. cfxRealize built-in workflows for Customer Success Management and adoption management enables better operational scheduling and improved business outcomes.

Key Capabilities

Utilization Management

- Asset deployment and utilization
- Reduce oversubscription

Optimize Spend

- Visibility into license purchased and installed
- Intelligently plan and budget for new equipment

Automated Inventory & Reporting

- Complete visibility into Asset portfolio & Reporting
- Automate data ingestion

Lifecycle Management

- Asset lifecycle insights
- Contract status
- Mitigate EOL, EOS risks

Customer Success Management

- Deliver customer value and increase adoption of software
- Business outcomes and KPI management

Self Service Web Portal

- Persona based Dashboards
- Customizable Reports (Daily, Weekly, Qtly)

- Real Time Data Ingestion & Integrations -
 Any Data, Any Source, Instantaneous
 Extensible Data ingestion architecture
 Native integrations with over 100+ widely used systems and tools

Key Benefits

Software Conversion to Subscription

Software Utilization

Software Compliance

Cost Savings after Renewal Optimization

Key Features

Optimize Spend	Complete visibility into asset spend, licenses installed and used. Plan refresh cycle.
Asset Inventory	Infrastructure, Applications, App Infra (Databases, Middleware etc.). Virtualized, Cloud
Asset Utilization Management	Complete view into asset deployment and utilization. Optimize subscription spend
