Company to Watch Out for...

"CloudFabrix's solution stack offers a compelling value proposition for Asian enterprises seeking to optimize their IT infrastructure and effectively govern cloud architectures. With enhanced focus on integrated IT management, analytics and measurable outcomes - Cloudfabrix is well aligned to support enterprises in their Digital Transformation journey"

- Nishchal Khorana, Director, Digital Transformation

Value Proposition

1. Outcomes driven AIOps solutions with ability to automate and enhance IT operations by using advanced analytics with machine learning
2. Focus on unifying teams, processes and technologies, thereby increase efficiency of IT transformation initiatives
3. Analytics driven asset lifecycle management that optimizes IT assets costs and usage
4. Ability to govern and analyze key business health metrics, spot opportunities for improvements and provide visibility into IT dependencies and risks

Recent Highlights– 2017/2018

- Launched Asset Life Cycle Management, an asset lifecycle management and adoption product to provide continuous visibility and intelligence to optimize hardware and software assets usage and spend.
- Launched hybrid IT monitoring platform built using cloud native architecture, which provides real-time monitoring intelligence of IT infrastructure, and cloud native applications, among others.

Frost & Sullivan Perspective

1. **Strong alignment to market needs:** Addressing a key need for enterprises in the cloud journey - visibility & governance across hybrid clouds. Monitors traditional IT, cloud and hybrid environments in real-time to gain deep insights into health, performance & availability of IT systems to run business efficiently and effectively
2. **Compelling value proposition:** Cloud native architecture and outcomes based approach coupled with advanced analytics to provide a feedback loop that is contextually relevant with recommendations aimed towards meeting the objectives
3. **Differentiated offering:** Integrated product offering with provisioning for partners to customize and build extensions enhance the differentiation and ability to create greater value for customers
